ABOUT COMPANY

DR INTERNATIONAL is one of the most renowned manufacturers, suppliers and exporters of a wide outcome of leather goods. These products are made by using original and quality approved leather. We also conduct regular quality checks in order to ascertain that there is no flaw in the final range. Our leather products are appreciated for durability, strength and resistance to color.

Our organization has a very modern and sprawling infrastructure which has all the latest and sophisticated facilities to maintain a swift rate of production. The organization also develops and produces licensed leather products for clients who have the requisite approval and agreement with the Buyers. We also make sure that highest international standards are duly followed and hence have employed a separate quality control team for the purpose

VISION AND MISSION

VISION

Our goal is to be the leading manufacturer of leather cords, beads, and laces in the Republic of India. We also hope to establish ourselves as a major global player and establish operations in developed nations and major global markets.

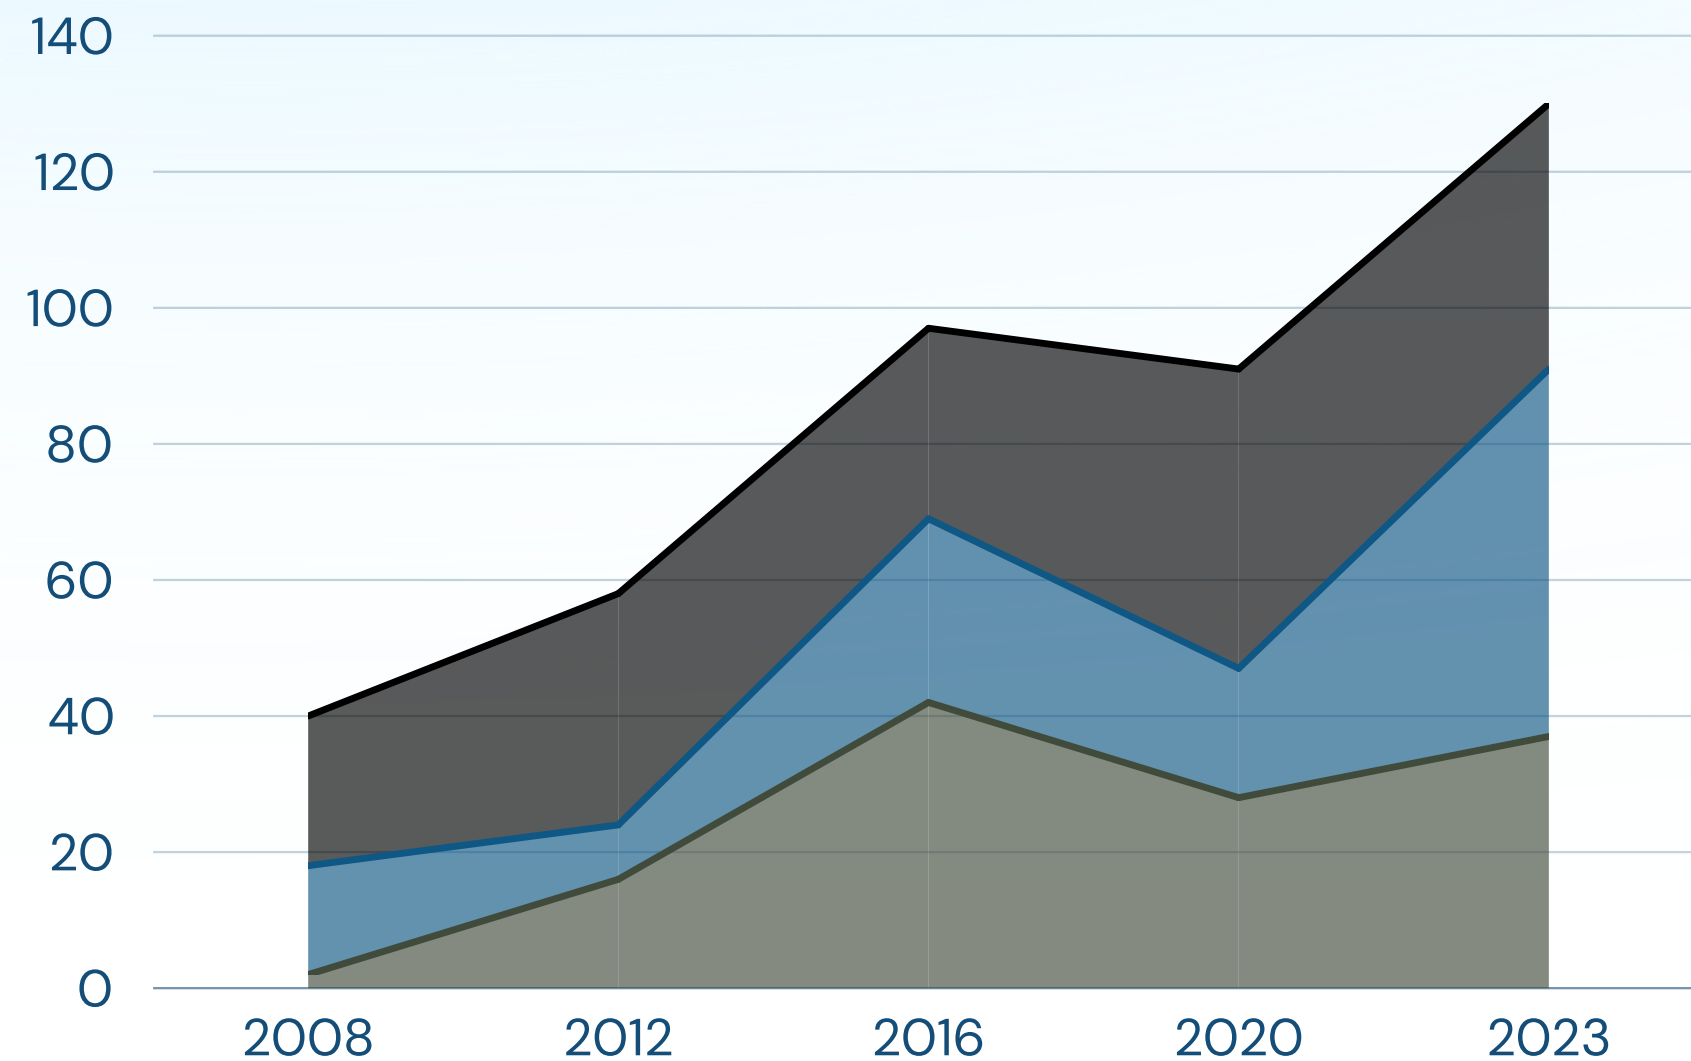

Our goal is to become more technologically savvy, highly skilled professionals who complement our people. By the end of this decade, we hope to be one of the most admired companies in our industry.

MISSION

Our ultimate goal is the satisfaction of our clients. Through excellence in technology, supported by best analysis and development, we will provide total client satisfaction and bring home the bacon leadership in selected markets, products, and services around the world. Our human resources can still be the most valuable asset in this pursuit of leadership and thus the driving force behind our growth. We are held accountable to the society. We will be wise corporate voters who are motivated by high moral standards in our actions. If one were to look for one word that embodies the corporate spirit, it's obvious from the moment you walk into the premises, within the various sides established and internalized into the company's ethics.

FINANCIAL OVERVIEW

With an annual turnover ranging between 2.5 to 3 crore, DR Leather International has consistently achieved financial success while maintaining a commitment to quality and customer satisfaction.

GLOBAL PRESENCE

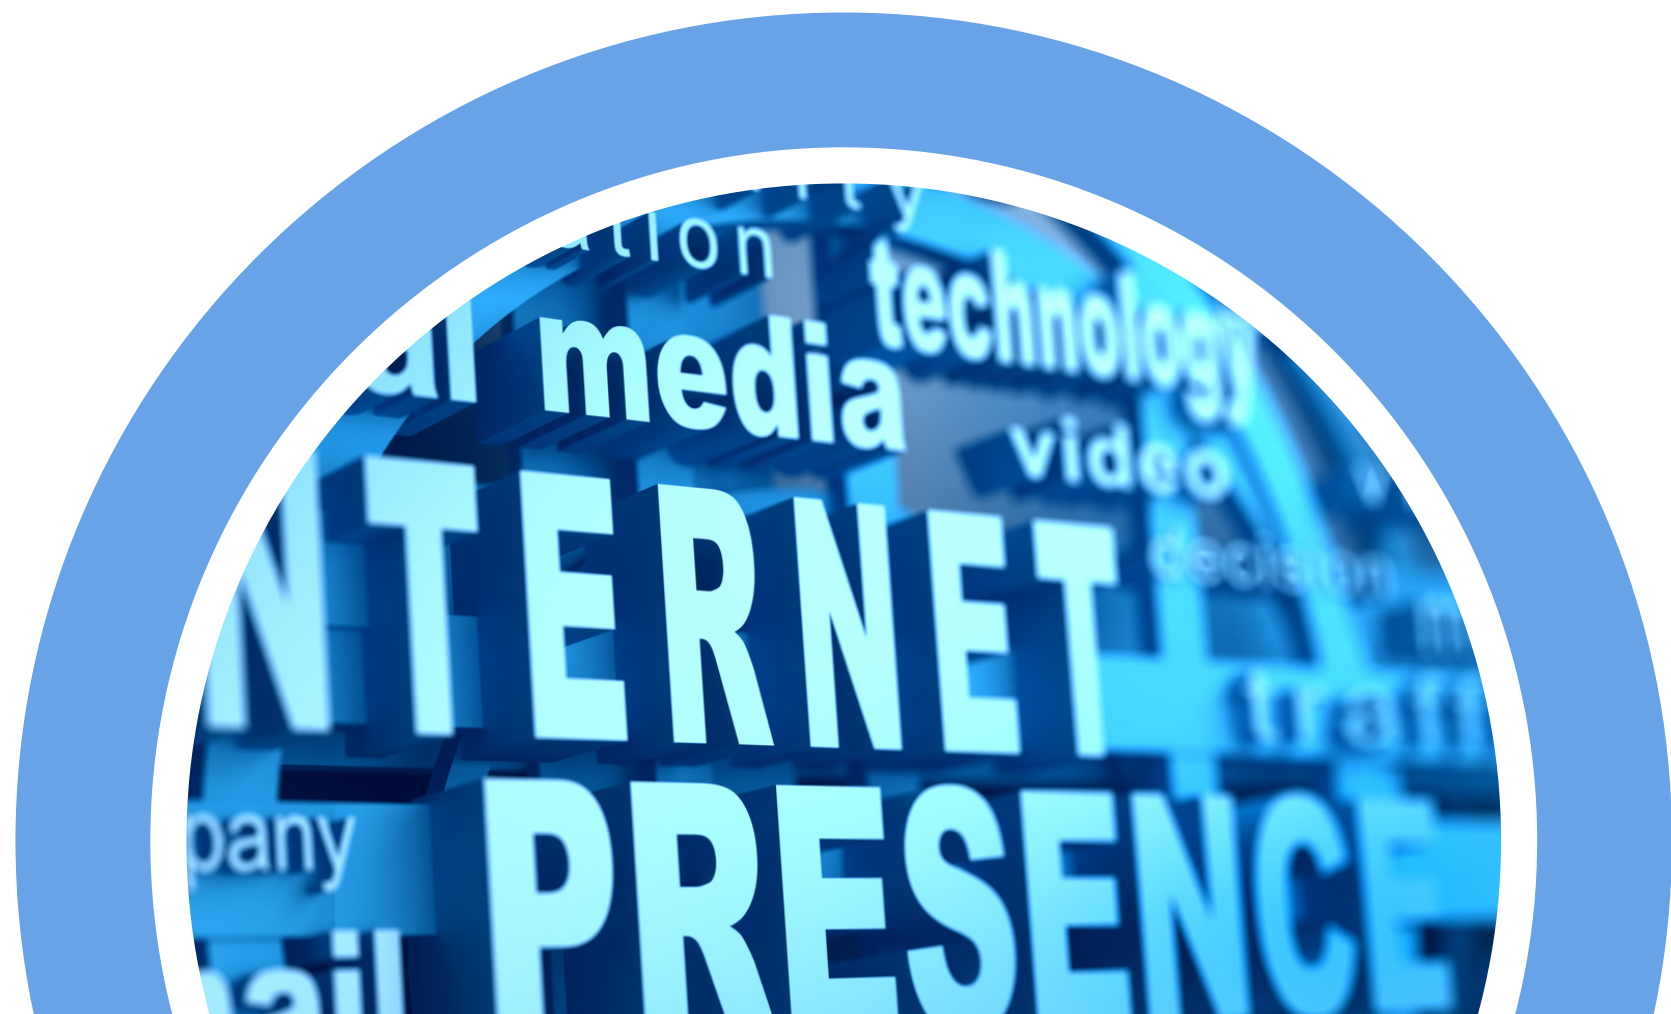

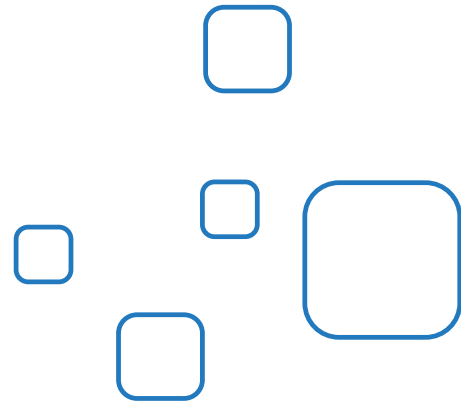

Our products have reached discerning customers worldwide, with a strong presence in the USA, Europe, and Asia. Serving over 237 companies across the globe, our leather creations have become synonymous with sophistication and style.

Experience The Elegance

Discover the perfect blend of craftsmanship and excellence with DR Leather International, where every creation tells a story of timeless allure. Explore our range and let the luxury of our leather creations redefine your style.

OUR INFRASTRUCTURE

- **Our company's infrastructure is neatly arranged and appropriately furnished with cutting-edge machinery and advanced technology. It is expertly divided into a number of divisions, including those for research and development, designing, sales and marketing, and production. These infrastructure divisions also aid in the mass production of goods while preserving their top-notch quality. Additionally, we regularly update it in accordance with technological advancements and developments to produce goods that meet customer demands and the most recent market trends.**
- **Our strong infrastructure deserves recognition for helping us to establish our dominant position in the global market. It contains a variety of units that are evenly distributed over a large area and supported by cutting-edge technology. Our manufacturing department relies heavily on these advanced machines, which provide rapid, customized solutions with large output. The extensive storage area plays a significant role in effectively handling the massive surge in demand.**

ROUND BRAIDED LEATHER CORD

PRODUCTION LINE

- Being a fully export-oriented organization, we tend to think that implementing cutting-edge technology in production is essential to achieving and retaining the company's leadership position. As a result, we frequently continue to invest significantly in sustaining our innovative infrastructure. This helps us offer our clients unrivaled services.
- All of the production facilities are constantly updated to reflect the latest technological advancements utilized by renowned companies that produce animal skin products worldwide. This guarantees the lowest lead times, best product quality, and cost-effectiveness. With a notably high put in capability, we also frequently take on large orders internationally. Every one of our products is produced in a plant that is climate-controlled.

Team and Expertise

WITH A DEDICATED TEAM OF 25 TO 30 SKILLED PROFESSIONALS, DR LEATHER INTERNATIONAL COMBINES CRAFTSMANSHIP AND INNOVATION. OUR ARTISANS ARE THE HEART OF OUR SUCCESS, ENSURING THAT EACH PRODUCT IS A MASTERPIECE OF QUALITY AND DESIGN.

VERTICAL INTEGRATION

At DR Leather International, we take pride in our vertical integration. With our own tannery, we control every aspect of the production process, from sourcing premium materials to crafting the final product. This ensures the highest quality standards and exclusivity in our offerings.

MAKING OF SEWN NAPPA

- It can be used with diamonds, gold, sterling silver, or any other kind of valuable jewel that improves the attractiveness of the product because of the precision of the outstanding stitching, the distinctive rounding, and the uniform thickness throughout the length created by the Italian machinery.

ROUNDING MACHINE FOR ROUND LEATHER

We have a Nozzle rounding machine that is imported from Italy. With this machine, we can create round leather lace in any size between 0.5 and 6 mm, if there is a gap in between. Additionally, it has a special instrument called a nozzle through which the leather is passed to preserve its uniform roundness and eliminate size variations.

SPIRAL CUTTING MACHINE

- Automated spiral cutter for leather and skin with a maximum diameter of 104 cm. The whole leather is used to start the process. The leather is centered to yield the best results with the aid of the colored circles engraved on the table. The leather is automatically put in the cutting position when the machine is started by pressing a pedal.
- Turning the leather around yields a workable circle with a maximum diameter of 104 cm (a table of cm 152 is optional) and the strap's starting point in the predetermined size. After the strap is inserted into the open transport wheels, the process begins automatically and may be adjusted to cut at a speed of up to 150 meters per minute, creating a continuous strip that is hundreds of meters long. When the straps break or run out, the machine immediately stops. The operator can work at multiple machines in this fashion.

SKIVING MACHINE

- Leather Skiving Machines are incredibly strong devices that can be used to bevel the edges of leather, even the heaviest 14/16 oz. skins. Because the leather is easily pulled through the bell knife by the feed wheel, creating a flawlessly even and smooth flat or beveled edge is simple. The operator may easily modify the width, depth, and contour of the skiving to any desired degree. You can choose to thin out a 1/4" thickness to the consistency of tissue paper, or you can eliminate a significant degree of roughness from the flesh or hair side.

ROUNDING OF ROUND LEATHER

These kinds of machines are part of our infrastructure, and we use them to manufacture fully round leather cords that are round all the way around without any flat spots. We also strictly monitor quality control at every stage of manufacturing.

QUALITY CHECK

In order to achieve a distinctive roundness without any flat spots along the length, we use very advanced rounding equipment. We have very tight quality control at every stage of production to further highlight our core skills.

QUALITY CHECK

- We adhere to stringent quality standards at every stage of manufacturing and have earned certification under the ISO 9001:2008 standard.
- One of the quality controls is product inspection, in which each product is visually inspected for minute details prior to being sold into the external market. Inspectors look at things like the product's sizing, coloring, rounding, and cord strength.
- To ensure that our customers receive the most value for their money, quality control places a strong emphasis on analyzing every deep toe of goods before shipping.

SPOOLING IN LEATHER CORDS

In order to achieve a distinctive roundness without any flat spots along the length, we use very advanced rounding equipment. We have very tight quality control at every stage of production to further highlight our core skills.
